Fwd Aquila Back Forty Wetlands Permit application submitted.rtf

Hi Everyone,
 Want to bring you up to date on the Back Forty Project.

In December, 2016 the MDEQ issued two permits for the Back Forty Project. And, in January, 2017, Aquila submitted its “revised and updated” Wetlands permit. The Wetlands permit is being reviewed by the MDEQ and additional parties. Scheduling of the Public Hearing and comment period for the Wetlands Permit hasn’t been announced.

The six attachments provide lots of information on this project. They include three items from Hal Fitch (MDEQ) and three items from SWUP.

Call or write with questions/comments.

Sorry for the erroneous email I sent you earlier.

P.S. Help me protect the Menominee River and Lake Michigan from the damage/destruction of this proposed mine. I want to be able to continue fishing for smallmouth bass on this great river.
